

# Glazing and decoration of ceramic tiles

## Contents

Foreword .....	14
<b>PART ONE</b>	
<b>GLAZING OF CERAMIC TILES .....</b>	<b>33</b>
<b>Chapter I - CERAMIC GLAZES .....</b>	<b>35</b>
1. Introduction .....	35
1.1 Ceramic glazes: their function .....	35
1.2 Ceramic glazes: their nature .....	35
2. Glass .....	36
2.1 The vitreous state .....	36
2.2 General characteristics of glass .....	37
3. Compositions of glazes .....	38
3.1 Frits .....	38
3.2 Mineral raw materials .....	39
3.3 Stains .....	39
3.4 Screen printing medium .....	40
3.5 Chemical additives for glazes .....	40
4. Chemistry of glazes .....	40
5. Types of glazes .....	42
5.1 Wet applied glazes .....	42
5.2 Dry glazes .....	44
5.3 Penetrating salts (soluble salts) .....	45
6. Glaze preparation .....	45
6.1 Milling .....	45
6.2 Screening .....	49
6.3 Storage .....	50
7. Preparation of screen printing glazes .....	50
8. Behaviour of glazes during application .....	50
9. Behaviour of glazes during firing .....	53
9.1 The main reactions that occur in the tile body during firing .....	54
9.2 Thermal expansion .....	55
9.3 Other thermal processes .....	55
10. Health and environmental aspects .....	58
<b>Capitolo II - APPLICATION OF GLAZE ONTO TILE .....</b>	<b>60</b>
1. Introduction .....	60
2. Glaze fall application .....	62
2.1 Waterfall application .....	62
2.2 Bell application .....	64
3. Glaze circuit .....	69
4. Influence of rheological parameters in glaze fall applications .....	70
5. Main defects that can arise from glaze fall application .....	72
6. Pollution and prevention .....	73
<b>Chapter III - DISC APPLICATION .....</b>	<b>74</b>
1. Constuction characteristics and operating principle .....	74
2. Distribution of glaze on the tile .....	75
3. Impact of droplets on the tile .....	76
4. Influence of rheological parameters .....	77
5. Glaze cycle .....	79
6. Main defects of disc application .....	79
7. Pollution and prevention .....	80
7.1 Noise .....	80
7.2 Glaze pollution .....	80

Chapter IV - SPRAY GUN APPLICATION .....	83
1. Construction characteristics and operating principle .....	83
1.1 Air spray guns .....	83
1.2 Airless spray guns .....	84
2. Glaze distribution on the tile .....	85
3. Glaze cycle .....	85
4. The booth .....	85
5. Main defects of spray gun application .....	86
6. Pollution and prevention .....	86
6.1 Noise .....	86
6.2 Glaze dispersion .....	87

Chapter V - OTHER ASPECTS OF GLAZING .....	89
1. Absorption of glaze water by the tile body .....	89
2. Glazing defects .....	91
2.1 Defects of the glaze in the liquid state .....	91
2.2 Glaze defects that are visible after application .....	93
2.3 Defects of compatibility .....	98
3. Accessory operations and special techniques .....	100
3.1 Brushing .....	100
3.2 Fettling .....	100
3.3 Spoon application .....	101
3.4 Wetting .....	101
3.5 Edge cleaning .....	102
4. Checks to be performed during the glazing stage .....	102

**PART TWO**  
**DECORATION OF CERAMIC TILES .....** 113

Chapter I - General principles .....	114
1. Introduction .....	114
2. Classification .....	115
3. The colours .....	117
4. Tiles as articles to be decorated .....	121
4.1 Tile body and glaze .....	121
4.2 Firing .....	127
5. The causes of colour variations .....	130

Chapter II - BASIC METHODS OF DECORATION .....	133
1. Decoration without ink separation .....	133
1.1 Brushing .....	133
1.2 Mottling .....	133
1.3 Glaze mixing .....	136
1.4 Application of grits .....	137
2. Decoration with ink separation .....	138
2.1 Hand decoration .....	138
2.2 Interaction between glazes .....	138
2.3 Polishing of ceramic tiles .....	140

Chapter III - SCREEN PRINTING .....	162
1. Introduction .....	162
2. Operating principle .....	164
2.1 Flat screen printing .....	164
2.2 Rotary screen printing .....	166
3. Factors that affect printing results .....	167
3.1 The printing mechanism .....	167
4. The squeegee .....	169
4.1 Definitions .....	169
4.2 Functions and influence on results .....	169
4.3 Materials .....	173

<i>Chapter IV - SCREEN PRINTING: THE SCREEN</i> .....	174
1. Definitions .....	174
2. Functions and importance for results .....	175
3. Preparing the screen .....	178
3.1 The image chosen for reproduction .....	178
3.2 The slide .....	180
3.3 The frame .....	181
3.4 The fabric .....	183
3.5 Tensioning .....	185
3.6 Fixing the fabric .....	188
3.7 Preparation of the fabric .....	189
3.8 Photoemulsion and how it is applied .....	190
3.9 Exposure .....	192
3.10 Developing .....	196
3.11 The finishing operations .....	196
3.12 Storing the screens .....	197
<i>Chapter V - SCREEN PRINTING: THE INKS</i> .....	198
1. The components .....	198
2. The medium .....	198
2.1. General criteria in the choice of medium .....	198
2.2 Water content .....	200
2.3 Properties that affect application .....	200
2.4 Glycols and polyglycols .....	204
2.5 Resin-enhanced media .....	205
2.6 Self-fixing media .....	207
2.7 Special media .....	209
3. Ceramic base .....	210
4. Ink preparation methods .....	210
5. Storage of inks .....	212
6. Checks to be performed prior tu use .....	212
7. Fixatives .....	214
<i>Chapter VI - SCREEN PRINTING: TILES AND MACHINES</i> .....	215
1. Tiles as articles to be printed .....	215
1.1 The search for ideal working conditions .....	215
1.2 Optimal moisture content of the layer of glaze .....	215
1.3 The causes of colour variations .....	216
2. Screen printing machines .....	216
2.1 Flat screen printing machines .....	217
2.2 Rotary screen printing machines .....	223
3. Printing defects .....	225
4. Derived applications .....	228
<i>Chapter VII - DECORATION BY DIRECT CONTACT</i> .....	230
1. Typographic decoration .....	230
1.1 Operating principle .....	230
1.2 Preparing the matrices .....	232
1.3 Preparing the inks .....	233
1.4 Printing characteristics .....	233
1.5 Preparing the surface to be printed .....	234
1.6 Main printing defects .....	235
2. Process engraving decoration .....	235
2.1 Operating principle .....	235
2.2 Matrix preparation .....	237
2.3 Preparing the tile body .....	237
2.4 Preparing the ink .....	238
<i>Chapter VIII - TRANSFER DECORATION AND SPECIAL APPLICATIONS</i> .....	257
1. Decal transfer .....	257
1.1 Principle .....	257
1.2 Printing characteristics .....	257

1.3 Preparation of printing surface	259
1.4 Effects during firing	259
2. Flexographic decoration	260
2.1 Principle	260
2.2 Printing characteristics	260
2.3 Preparing the surface to be printed	262
3. Decoration with penetrating salts (soluble salts)	262
3.1 Principle	262
3.2 Application characteristics	263
3.3 Inks	267
3.4 Preparing the printing surface	267
4. Third fire decoration	267
4.1 Principle	267
4.2 Printing characteristics	268
4.3 Inks	269
4.4 Preparation of surface to be printed	271
5. Grit decoration	272
5.1 Principle	272
5.2 Application characteristics	273
5.3 Glues	273
5.4 Application units	274

### **PART THREE**

#### **NEW TILE GLAZING AND DECORATION SYSTEMS** . . . . . 277

1. Introduction	278
2. Roll (or contact) glazing	279
2.1 Operating principle	279
2.2 Glazes used	280
2.3 Tile body characteristics	280
2.4 Description of application	280
2.5 Conclusions	281
3. Decoration at the press	281
3.1 Operating principle	281
3.2 Through-body decoration	282
3.3 Surface layer decoration	283
3.4 Decal transfer decoration	284
3.5 Surface decoration / glazing	285
4. New applications based on the decal transfer technique	286
4.1 Decal transfer at the press	287
4.2 Decal transfer on the production line	288
5. Electrostatic glazing	288

#### **APPENDICES** . . . . . 291

Appendix A: Principles of rheology	292
Appendix B:	297
B.1 - Waterfall application	297
B.2 - Bell application	298
B.3 - Disc application	300
Appendix C: Drying theory	304
Appendix D: Screen printing theory	310
Appendix E: Deformation of the image due to deformation of the screen	318
Appendix F: Observations on minimum reproducible grey levels	322
Appendix G: Behaviour of immiscible liquids	324
Appendix H: Tables for calculating ceramic parameters	329
Table H.1 - Factors for determining thermal expansion	329
Table H.2 - Viscosity coefficient	330
Table H.3 - Surface tension coefficient	331
Appendix L: Characteristics of the main media	332
