

COLOUR, PIGMENT AND COLOURING IN CERAMICS

INDEX

Presentation

Introduction

Acknowledgements

Index

Chapter 1: Light, colour and general principles

Chapter 2: Colour and how to measure it

Chapter 3: Inorganic Pigments: definitions, characteristics and classifications

Chapter 4: Pigments for Glazes and Body Stains: basic characteristics and differences

Chapter 5: Ceramic Pigments for Glazes

Chapter 6: Ceramic Pigments for Bodies (Body stains)

Chapter 7: Pigments for Sanitaryware

Chapter 8: Specialities for Decoration and Third Fire. Metallic Lusters

Chapter 9: The effect of Process Variables on the colour and appearance of materials in the ceramic industry (by M.Paganelli)

Chapter 10: Soluble Salts: Organometallic Complexes for colouring and decorating Porcelain Gres

Chapter 11: Colourimetry and Colour Matching: measuring colour, formulation, copying and

reproduction

Chapter 12: New colourants and future trends (by M. Paganelli)

Chapter 13: Production of inorganic pigments for ceramic use

Chapter 14: Industrial management of pigments and Environmental Risks

Chapter 15: Outlines of Toxicology with reference to ceramic pigments and soluble salts

Chapter 16: Industrial Use of pigments, problems and recommendation

Appendix 1. Experimentation on the development of colour in terms of the chemical composition of Porcelain Gres Bodies

Appendix 2. Technical Glossary of Colour, Pigments and Colouration in ceramics
